

PVS-7 | ANVS-3347

NIGHT VISION GOGGLE

The PVS-7 (ANVS-3347) is one of the most popular night vision goggles frequently procured and used by U.S. ground forces for nighttime missions. Designed for the convenience of dual-eye observation utilizing a single image intensifier tube, making it more affordable and easy to maintain vs dual tube systems. The PVS-7 is also equipped with an automatic high light cut-off to protect the image intensifier tube, "IR on" and "low battery" indicators. It is built to be water-resistant, capable of hands-free operation, and utilizes quick connect and disconnect features.
